Goldmedal Electricals launches i-Touch Wi-Fi Switches

Tuesday, 28 May 2019

Share this on: [Social Media Icons]

Goldmedal Electricals, a fast moving electrical goods (FMGE) company, launched i-Touch Wi-Fi Switches. This is a range of home automation switches that can be controlled manually as well as through a remote control, mobile app and voice commands, viz Amazon Alexa and Google Assistant.

These switches are easy to install as they can be retrofitted into the existing wiring of one's home – without the need to drill any new holes or rewiring.

The switches feature blue backlit LED touch buttons making it easier and convenient to operate the unit in the dark. The switches are equipped with a micro controller chip that saves all the parameters pre-set by the user, hence making it easier to operate.

The products that are available within the i-Touch Wi-Fi switch category include four switch with master, two switch with fan and master, two switch, fan regulator, dimmer, and six module i-Touch panel.
