# Switch to the amazing

EDITION MAR 2K26  
PRODUCT & PRICING MANUAL

# Experience the amazing!

How *amazing* can electrical switches, lights, fans, and wires be? Unbelievably so, if you look at the Goldmedal range of products. First of all, they are all so fashionable to look at – from their sleek lines to their gorgeous colours and finishes – every product looks like a fashion accessory for your home.

But you don't have to go by their looks alone. Consider their functionality and you'll appreciate why they are so amazing! Whether it is home automation products, fans, LED lights or even simple products like switches or home appliances such as irons and geysers, every product is engineered with precision, keeping in mind the unique needs and tastes of Indian homes. The result? A perfect harmony of form and function that elevates your everyday living.

As someone who appreciates great style and loves incorporating such products in their daily life, I'm absolutely delighted to be associated with Goldmedal. Their products complement my sense of fashion and I can't wait for you to experience the same joy they bring me.

Trust me on this, you'll be convinced once you see them in action!

CELEBRATING  
EXCELLENCE

reddot winner 2025

loom.

Crafted for India. Celebrated by the World.

The Loom switch by Goldmedal has been awarded the prestigious Red Dot Award - one of the highest honours for design excellence. Integrating fabric as a functional element, Loom is a bold reimagination of a household essential. This global recognition reaffirms Goldmedal's commitment to creating everyday products that are not just functional, but truly world-class.

winner 2026

ROOTS

Rooted in Nature. Alive with Light.

The ROOTS Lighting System by Goldmedal has been recognised with the iF Design Award 2026, joining the ranks of the world's most celebrated design achievements. A living, modular installation that breathes and responds to the air around it, ROOTS reimagines light not as a utility, but as a presence. One that thinks, adapts, and glows with quiet purpose. A proud reflection of Goldmedal's vision to keep pushing the boundaries of light and design.

## A visual symphony that elevates our existence.

Colours influence our everyday lives in ways we may not always realize. They surround us in every aspect of our lives, painting the world with a vibrant palette that evokes emotions, ignites imagination, and shapes our perceptions. It plays a pivotal role in human expressions and creations. They awaken a sense of wonder, reminding us of the awe-inspiring wonders that surround us. Therefore, let us fill our lives with the beauty of colours and create a life adorned with shades that make each moment more meaningful.

# Endless possibilities for modern living

### Polybutylene Terephthalate (PBT) Switches

Switches are superior quality electrical devices that are easy on the eye and extremely delightful to use. Making the smooth user experience possible is a combination of components that are precisely crafted from high-quality materials. The terminal contacts are supported by a casing of polybutylene terephthalate (PBT) within a PC base. With a high melting point above 200 degree Celsius, the PBT casing insulates every part of the switch from any electrical or thermal leakages. The thoughtful construction of the Goldmedal switches thus ensures greater reliability and increased durability over its long years of service.

Presenting the next step in smart living. The i-Touch WiFi panels are the latest devices in Goldmedal's family of automation switches. Sleek and stylish in appearance, these backlit LED WiFi panels have a host of functions including switches, fan regulators, USB sockets, and international sockets. Apart from manual operations, you can also control these panels using the RF Remote control and voice commands. You can even operate these panels from anywhere in the world using the i-World mobile app. There's no gateway required - the technology is built into the device. A complete system by itself, the module can be installed directly into a regular junction without the need for any new wiring.

# i-WORLD Automation

Goldmedal presents the i-World app. The easiest, most convenient way to monitor, control, and customize all your electrical devices that are part of the i-Touch/i-Smart Wi-Fi ecosystem.

You can not only control devices, but also share this control with others by creating multiple users and setting up different usage rights. So, share control with your family, or restrict usage of certain rooms or devices with other users, or categorize devices by room, or assign administrator rights to someone – the possibilities are simply immense.

The i-World app can also be integrated with Amazon Alexa and Google Home Assistant. Just speak out your wish and the i-World app will do as you command!

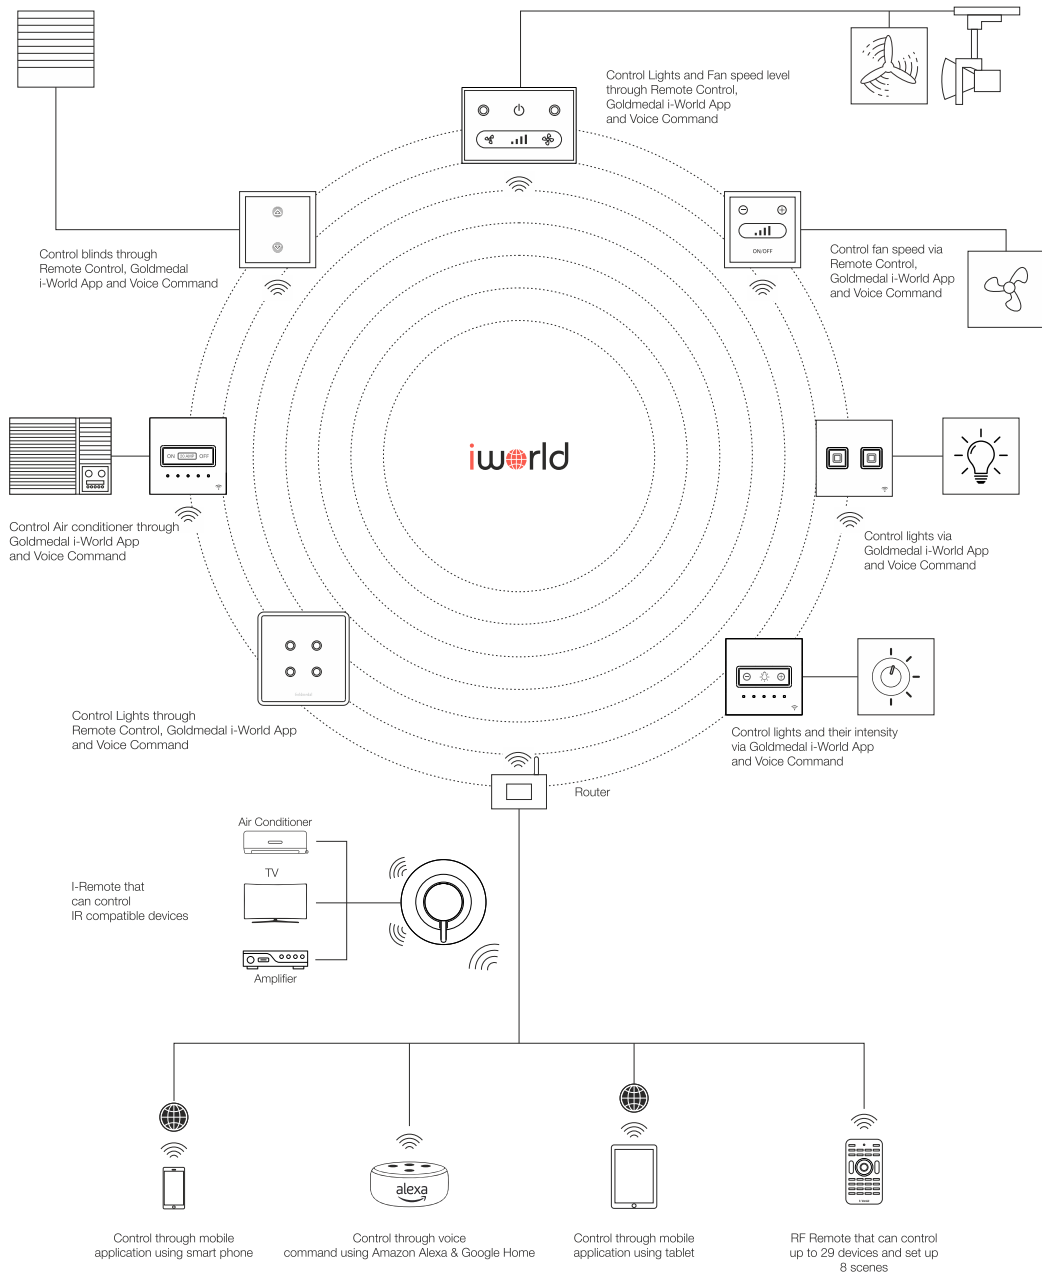

Switch to a smarter lifestyle with smart switches from Goldmedal.

Classio Black Walnut Plate with Digital Silver I-Touch WiFi Switch

**GLASSIO**

The Glassio is without doubt a classical beauty – exhibiting a smooth, glossy frontage, with soft, rounded edges and a demeanour that’s sophisticated yet warm and welcoming. The elegantly flared corners reflect and absorb light in a manner that adds depth and character to the cover plate. This interplay of light and shadow also creates a sinuous effect that makes Glassio the definitive artefact on your wall.

# Air

Flat. Flawless.  
Flamboyant.

# Aura

The Aura has a forceful presence that commands attention. With its perfect, crisp lines and distinct shape, the Aura highlights the precision and style that defines the Air range. The Aura is the perfect choice for interiors that are practical yet modern.

Perfect crisp lines that define the Air range

# Aero

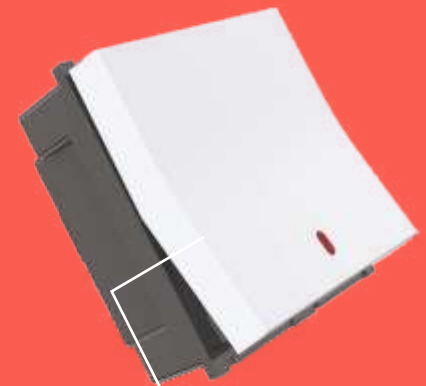

The Aero redefines flat switches. Styled to remain absolutely flush with the cover plate, the Aero emphasizes the minimalistic design of the Air range. Manufactured using the very best in raw materials and processes, the Aero is both functionally and aesthetically a class apart!

Completely flat - at OFF position

# Arc

The Arc switches by Air symbolizes minimalistic elegance. Easy on the eye as well as a pleasure to use, the Arc can be the perfect accessory in stylish homes with graceful settings. Crafted to perfection using the very best in technology and materials, the Arc adds a new dimension to your interiors.

A symbol of elegant minimalism

# Distinctly flat, slim and minimal

The AIR range of modular switches and systems breaks the mold with its classy, minimalistic, uniquely flat, and slim appearance. An example of meticulous craftsmanship, careful detailing, and unmatched excellence, the AIR range makes other ordinary switch ranges appear unwieldy and extravagant. Absolutely light and modern, the AIR range marks a new beginning in the world of standard fittings. Slim, stylish, minimal – the AIR devices shout quality, elegance, and finesse through every inch of their presence.

## FLUSH MOUNTING METAL GANG BOX

Compact, resilient and sturdy, the Goldmedal metal gang boxes are the ideal enclosures for your switchboard accessories. Available in galvanized and 304 grade stainless steel options, these metal gang boxes securely hold all electrical wires and components in place without any additional support. While the galvanized metal boxes are corrosion-resistant, the stainless steel metal boxes are rust-free, easy to clean, and extremely strong and durable. With their simple yet robust design, these mounting boxes play a passive but invaluable role in ensuring that your electrical devices perform to their optimum without any interruption!

•Conforms to IS 8623-1 & 3, IEC 61439-1 & 3 •IP-30.  
 •Suitable for Surface & Flush mounting. •Enclosure is made up of CRCA Sheet steel, RAL 9003 Powder coated, •with din rail, removable bus -bar, shrouded neutral/earth link with Conditional Short Circuit Rating of 15kA in SPN DB provided with isolable neutral link to carry out isolation test, also with high integrity/Clean Earth kit as accessory for electronic/IT installation to meet international safety standard DBs design with ample space for wiring. •There is a provision for DP MCB /Isolator/ RCCB/RCBO as incomer & SP MCBs as outgoing.

Safe, reliable  
and efficient.

## AirMCB

Compared to a traditional fuse, MCBs are designed to operate accurately under both overloading and short circuit conditions. Unlike a fuse, MCBs can also be reset quickly after they trips. RCCBs play an equally important role by automatically detecting and disconnecting the circuit whenever a fault occurs or the current exceeds the rated sensitivity. The MCBs and RCCBs from Goldmedal are housed within a plastic moulding that is made of flame-retardant, high strength plastic. The quality of the material used and its design ensures that these devices are highly durable and appear new in spite of years of use.

Maximum safety,  
seamless power control.

**Air RCCB | CHANGEOVER**

Rapidly cuts off power during abnormal currents, preventing electric shock and enhancing home safety.

## AirecoDB

The AirEcoDB distribution boards are sleek, stylish and elegant in appearance. Its appearance reflects the supremely minimalistic look of the AIR Range to which it belongs. Its crisp, clean lines accentuate the powder-coated, superior finish and durability of the product. Suitable for flush and wall mounting, the AIR DBs offer ample space for easy installation of MCBs, RCCBs and for all the wiring required. The AIR Distribution Board also complies with all the standard requirements and is water and weather resistant so that it retains its international look even after years of use.

Control, protect, and manage power with ease.

**homeguard**  
Main switch & Fuse units

The Homeguard fuse units protect against overloads & short circuits, cutting power during faults to prevent damage. They ensure safe maintenance, prevent electric shock, and offer easy ON/OFF control. Essential for safeguarding lives & property from electrical incidents, these devices are a crucial investment in safety.

## IT'S A SWITCH. IT'S ALSO A REMOTE!

The GMesh remote controller is a switch-cum-remote control. You can fix it to a wall or a table and thus use it as a switch (wirelessly), or you can take it with you and use it as a remote control.

Goldmedal's GMesh technology gives you the comfort of a wired automation system without changing the existing wiring in your home. From switching to dimming to controlling fans and curtains, to RGB lighting control to tunable lighting control, everything is possible with GMesh. Add the Bluetooth based devices to your existing network and its done. You do not need a Wi-Fi or an Internet connection to control your room functions. Just switch on Bluetooth on your mobile phone and connect to your home network!

## Bluetooth Controller

G-Mesh products can handle DALI, Tunable White, RGB & RGB-W Control, Human Centric Lighting Control and is also ready for all future upgrades. While this may sound complex, it will surprise you to know that G-Mesh commissioning and set up is so simple that even a child can do it! Yes, even changing a lighting scenario is a simple task.

A2D0001 is a BLE-enabled 2 channel 0-10V or DALI controller. It has a universal 100-277V AC input voltage range and can control 2 separate analog channels, 1 Tunable White channel, or one Dali channel.

PWM0004 is a BLE-enabled four-channel PWM dimmer for constant voltage LED loads, such as LED strips and constant voltage LED modules. The same device can be used for both 12 and 24V DC LED strips. Separate drivers are not required for LED strip or RGB Strip dimming.

REL0004 is a BLE enabled 4 channel relay with 4 separate inputs to control BLE device on the network. The 4 inputs can be freely programmed to do operations like Dimming, curtains, master functions etc. The device can be used for curtain control also.

DCS0001 is a BLE-enabled DALI controller. It does not have its own power supply. Instead, it is powered directly from a DALI bus. DCS0001 can be used with a DALI sensor for presence detection or daylight harvesting or it can be used for controlling Human Centric Lighting (HCL).

TED0001 is a BLE-enabled trailing-edge dimmer for operation of incandescent lamps, dimmable LED lamps, and dimmable LED control gear. It can be installed in the ceiling, inside a luminaire, or into a ceiling outlet box.

ASD0001 is a BLE-control unit for LED drivers with 0-10V, 1-10V, or DALI dimming interface. The control output can be configured either as analogue 0-10V (and 1-10V) or as a digital standalone DALI control interface.
