THE ART OF INTELLIGENT AIR

FANS BY GOLDMEDAL

BLDC CEILING FANS

UNDERSTANDING SUPER EFFICIENT BLDC FANS

Brushless Direct Current (BLDC) fan technology utilizes a motor with a permanent magnet, replacing the electromagnets used in traditional induction motors. This design ensures smoother, quieter operation, higher energy efficiency, and longer lifespan while maintaining effective air delivery. BLDC technology has become increasingly popular for its ability to significantly reduce energy consumption, making it ideal for energy-saving and smart home applications.

ADVANTAGES OF BLDC MOTOR FANS

- Lower electricity consumption (60% savings)
- Longer backup on inverters (even on solar)
- Improved reliability
- Noise reduction
- Longer lifetime

A typical induction-based fan consumes approximately 75 watts, whereas a BLDC fan consumes only about 30 watts. Fans are appliances that often run continuously, especially in areas with high temperatures and minimal airflow. Assuming a fan operates for 15 hours daily throughout the year, the energy consumption calculation would be as follows:

Fan	Wattage	Hourly Electricity Consumption	Daily Electricity Consumption	Yearly Electricity Consumption	Yearly Costs (8 per unit)
BLDC Fan	30 Watts	0.030 Units	0.45 Units	164.25 Units	₹ 1314.00
Regular Fan	75 Watts	0.075 Units	1.125 Units	410.625 Units	₹ 3285.00

The average cost of electricity per unit for residential users in India is around ₹6.

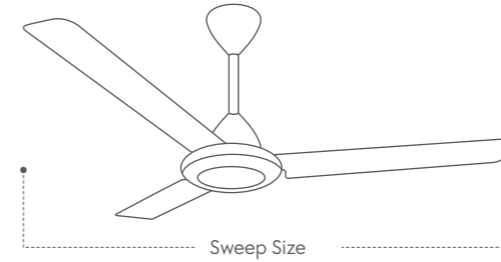

BLDC fans can help you save approximately ₹1,500 annually on energy costs.

BLDC fans are priced starting at around ₹3,000, compared to ordinary fans, which cost approximately ₹1,500. However, if your fans run for over 15 hours daily and the electricity cost per unit is above ₹7, BLDC fans can help you recover their cost through energy savings in less than two years.

CHOOSING THE PERFECT CEILING FANS

Visit our nearest Goldmedal showroom, or a local shop dealing in Goldmedal fans. • Explore our range of products at the store or browse through our catalogue available in the Downloads section on our website www.goldmedalindia.com • Understand your specific requirements and choose a Goldmedal fan that meets your needs. • Select from categories including ceiling, ventilation and exhaust, pedestal, wall, table, lifestyle, personal, and industrial fans. • Our feature-rich range includes exquisite designs, anti-dust technology, high-speed fans, BLDC motor technology, RF remote control, sleek IR remotes, 60% energy savings, high air delivery, wide voltage compatibility, thermal overload protectors, low noise, rust-proof bodies, 360-degree oscillation, and energy-efficient motors, among others. • All Goldmedal fans are functionally modern and visually appealing, designed to complement any interior style. • Goldmedal fans are available in a variety of shapes, sizes, colours, and designs to match your unique preferences.

Lower electricity consumption means higher savings. The more the stars, the better the savings

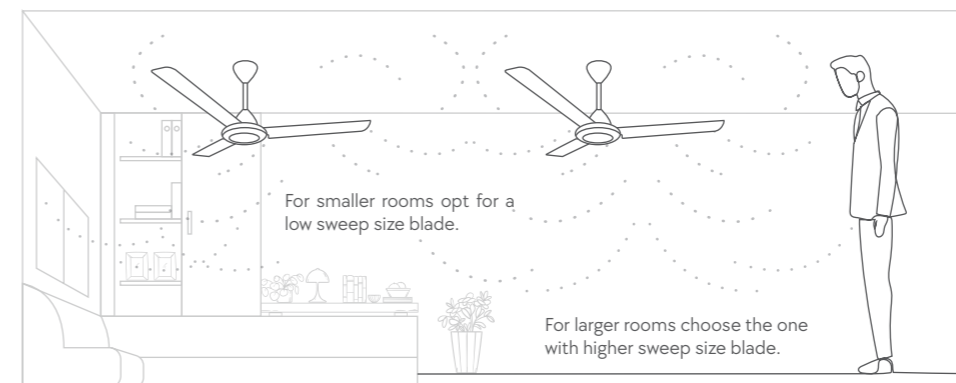

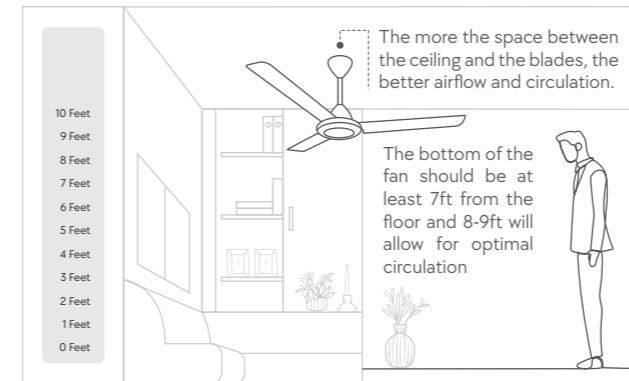

Sweep- Air delivery is proportional to its sweep. It means the more the sweep, the better the air delivery. But, remember that the area also decides its efficiency.

Speed (RPM)	Air Delivery (CMM)
315	240 ✓

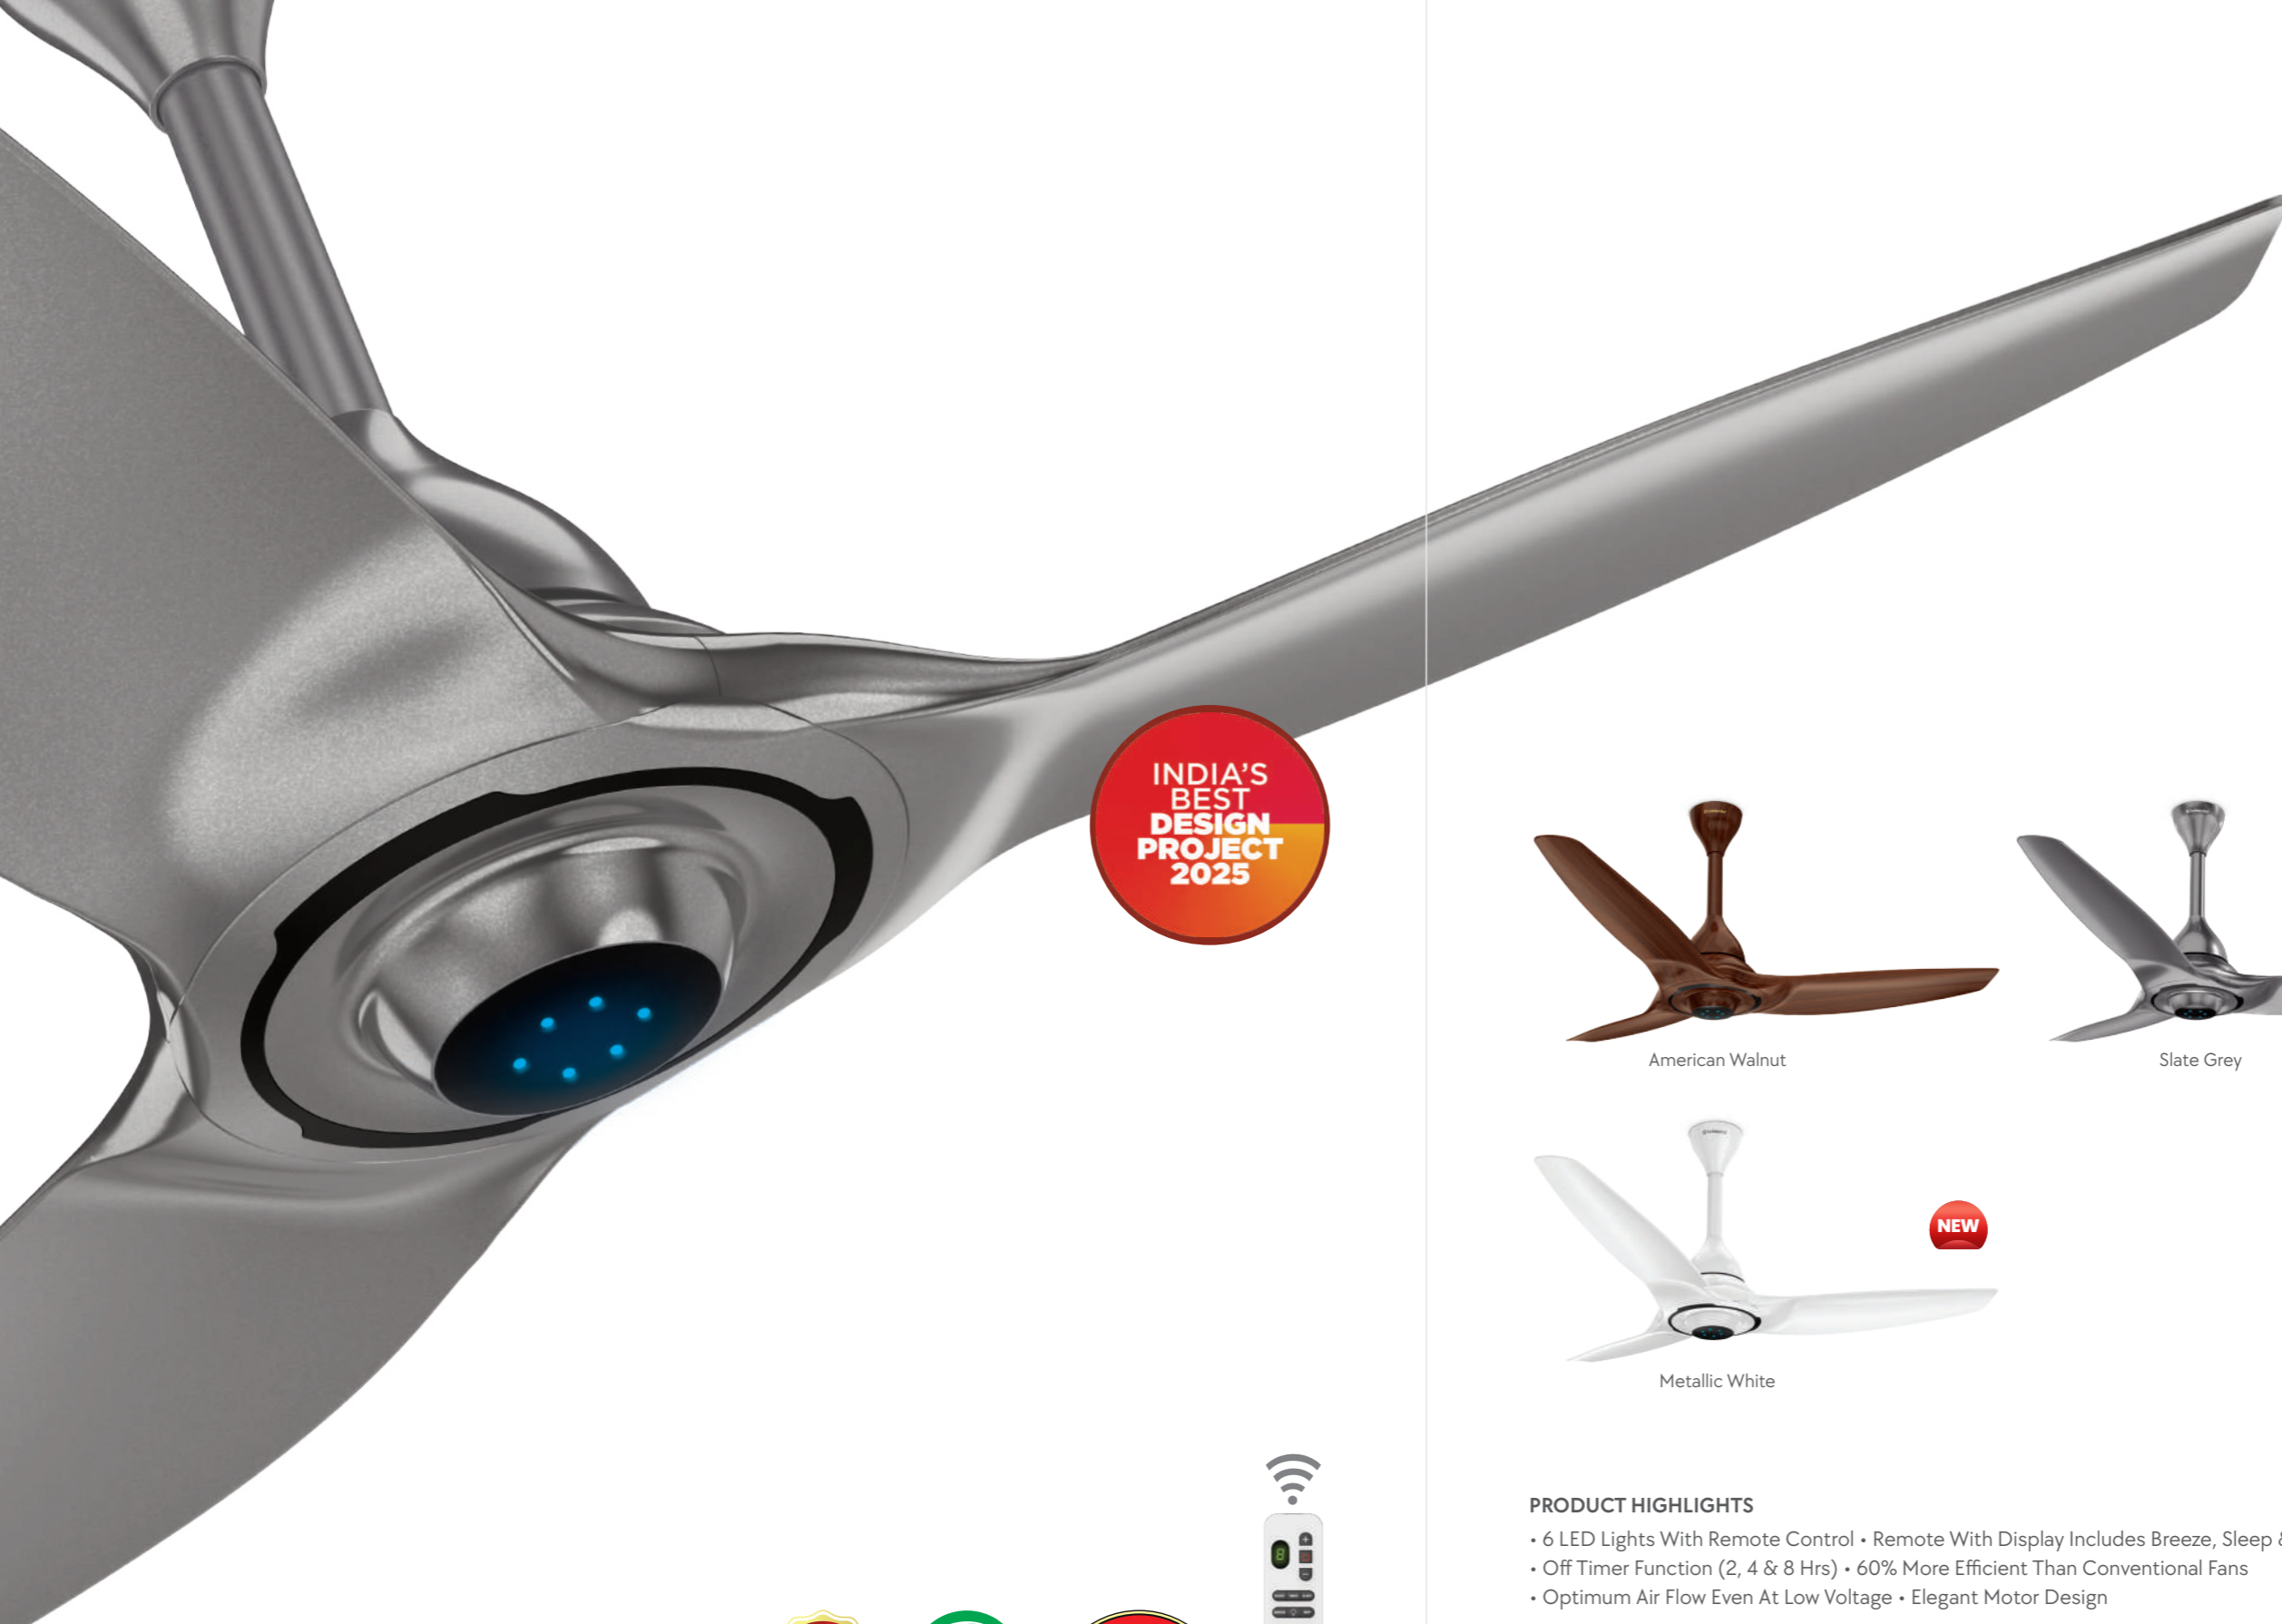

Higher RPM does not mean higher airflow. Airflow/air delivery is the only point that matters in selecting a ceiling fan.

OPTIMAL CEILING HEIGHT

Use ceiling fans for rooms with tall ceilings, and choose personal or wall fans, for rooms with low height ceilings.

Sweep Size	Sweep Size
600mm (24')	Small Shop, Cabin, Kitchen, Powder Room
750mm (30')	6 x 10 ft
900mm (36')	7 x 10 ft
1050mm (42')	10 x 10 ft
1200mm (48')	12 x 13 ft
1300mm (52')	13 x 14 ft
1400mm (56')	14 x 15 ft

HUSH FLO BLDC
SUPER DECORATIVE CEILING FAN

Redefine your living experience with the Hush Flo BLDC fan, where modern design meets everyday comfort. The six-LED light system, conveniently operated via remote control, creates soft ambient lighting that enhances your space. Designed for quiet operation, it blends seamlessly with contemporary interiors. A high-performance motor paired with sleek ABS decorative blades ensures superior air circulation, while 2, 4, and 8-hour off-timer settings allow you to customise comfort effortlessly.
