HOSPITALITY

Instruction Sheet

Technical Characteristics

Six Way Bell Indicator (6M) For call display & acknowledgement combined with buzzer

This unit helps you to attract the attention of staff in hospitals, clinics, hotels, residential premises, etc. For example, a patient in a hospital can draw the attention of a nurse by pressing the bell push button in their room. This activates an inbuilt buzzer along with the lighting of an associated LED on the bell indicator unit (106567) in the nurse station. The Six Way Bell Indicator assembly is a composite unit with inbuilt buzzer and can cater to six different actuating locations.

Functions

 Managing call communication: Between six to one

 Residential house
 : Between owners and attendants.

 Hospital
 : Between patients and nursing station.

 Hotel
 : Between hotel guests and attendants at the reception counter, housekeeping, etc.

 Office
 : Between officers and their peons, subordinates.
